Autodidact with heartfelt passion about tech; technology is going to save the world, and I want to contribute! I am a tenacious, professionally trained programmer with a knack for hard work, in search of a company seeking a driven, technically astute Junior Developer. Practical hands on experience working directly with clients and strong communication skills.

WORK EXPERIENCE

Collective Education LLC
Brecksville, OH
Lead Instructor
2017 - Current

- Provided technical instruction to a class of nine students for *Collective Education LLC Coding Bootcamp* by developing exercises, lessons and lesson plans
- Led lecture and provided more than 500 hours of in-class instruction. Increased retention by 28%
- Met with individual students on a weekly basis 1:1 to ascertain progress and proactively resolve difficulties

American Professional Society on the Abuse of Children
Remote - *Web Development Consultant*
2017-2018

- Served as project lead on a team of three junior developers to architect a web application from the ground up
- Interacted directly with the product owner, maintaining open lines of communication and implementing feedback where appropriate
- Team was responsible for the writing, testing, and hosting of the application

Van Auken Akins Architects LLC
Cleveland, OH
Marketing Intern
2018 - Current

- Primary manager of company database in Cosential (CRM) of more than two-thousand accounts
- Implemented automated workflows for the ongoing update of project details
- Assembled brochures and other documents using Adobe InDesign and Photoshop

DEVELOPMENT PROJECTS

APSAC.org App: Application that scrapes excel file and parses the collected data into an array of JSON objects. Data is then displayed in tabulated format using Extended Bootstrap Tables to enable search and filtering capabilities.

apsac.org/cm-academic-program-database

Rayjects.com: Responsive band website/blog, incorporates Sass and a bootstrap template. Hosted through AWS and developed using Gulp/Babel and WebPack.

rayjects.com

Tic-tac-toe App: A two-player Tic-tac-toe game utilizing jQuery, Heroku, and Node.js. The game state is stored server-side via AJAX.

github.com/Glen-Cocoa/mod_tac
